January 2023 | 1st Newsletter

The CareerBot partnership seeks to improve Digital Readiness of the Career Guidance sector by implementing CareerBot methodology and tool, facilitating blended guidance sessions and to use customized Labour Market Information (LMI) to empower marginalized job seekers. We want to put Career Guidance Practitioners at the centre and assist them – and their organisations – on the path of digitalisation so that they can advise their clients in the best possible way.

With the help of our methodology, job seekers will be able to gather relevant information before and after personal interviews, so that valuable personal services can be used efficiently. With the “CareerBot project” we propose a pilot that focuses on the role of career guidance, which became more demanding, and must be adapted more rapidly and flexible to the changing needs of the new world of work.

The CareerBot project includes 4 main outcomes:

1. CareerBot Content and Methodology
2. CareerBot Tool
3. Blended CareerBot training for Career Guidance Practitioners
4. Transfer Handbook for Implementation with focus on Organisational Development (OD)

Here you can have a look at the preliminary version of our CareerBot/ pre-pilot phase: <https://careerbot.eu/bot/bot.html>

First f2f Transnational Project Meeting in Dublin, November 2022

Following key virtual meetings, last November 2022 we were able to meet in person in Dublin, to review the progress of the different Project Results and Activities, develop stronger bonds within our partnership and update the implementation plans going forward.

We are delighted with the consultations and baseline analysis carried out up to date, collaboration between the project coordinators and links with associated organisations contributing to the CareerBot. We hope to obtain feedback from a diverse range of Career Guidance Practitioners and colleagues who will be trained to use the CareerBot with their clients during 2023.
